

1 Lance Price is a Professor at the Milken Institute School of Public Health at George
2 Washington University and the Founding Director of the Antibiotic Resistance Action
3 Center. Dr. Price works at the interface between laboratory research and public policy to
4 address the growing crisis of antibiotic resistance. Prior to joining GW, Dr. Price directed
5 the Center for Food Microbiology and Environmental Health at the Translational Genomics
6 Research Institute. He received his PhD in Environmental Health Sciences from the Johns
7 Hopkins Bloomberg School of Public Health, where he was a Center for a Livable Future
8 Predoctoral Fellow.
